27 - 29 JUNE 2023

POLLEN 2023: The 4th Biennial Conference of the Political Ecology Network Political Ecology: North, South, and Beyond

#POLLEN22 | www.pollen2022.com | @PolEcoNet

Organised by: The Discipline of Geography and the Centre for Civil Society at the University of KwaZulu-Natal
Support is provided by the South African National Convention Bureau (SANCB), the South African National Research Foundation (NRF)
Conference organiser: African Agenda.

SPECIAL FREE DAY REGISTRATION AND DISCOUNTED FULL CONFERENCE REGISTRATION

Greetings from the Local Organizing Committee of the Biennial Political Ecology Network (POLLEN) Conference 2023

The Political Ecology Network (POLLEN) is an international network of researchers, with the following objective:

POLLEN seeks to provide a platform for the 'cross-fertilization' of ideas, where the world's many rich, diverse traditions can come together, discuss, and debate the latest developments in the field. Historically, the term 'political ecology' has not been confined only to an analytical approach and research agenda, but also to the theories and narratives that mobilize social and political movements with an ecological agenda. We, therefore, aim to function as a vehicle to promote, encourage and facilitate political ecological research with other academic fields and disciplines, as well as civil society and the arts.

POLLEN23 will be the first time the network has its conference in the global south, and this year's event is being hosted from the 27th – 29 of June at Howard College, UKZN. We have a full program of international and local speakers on diverse topics, across a range of disciplines. The preliminary 'program-at-a-glance' can be found [HERE>>>>](#)

As an outreach activity, we are offering 50 free day registration options per day, and a heavily discounted full conference registration option of R825. This is aimed to include interested postgraduate students at UKZN, UKZN staff, local Civil Society actors, those in the environmental sector and those in the arts. In particular, we would encourage participation from disciplines at the university in Law, Geography and Environmental Science, Economics, Sociology, Politics, Anthropology and Art.

If you would like to register, please proceed to the following [LINK >>>>](#)

Please be aware that the free registrations will be allocated on a first-come first served basis.

Regards,

Adrian Nel (UKZN Geography) and the POLLEN23 Local Organizing Committee
